

FCC Commissioners
The Federal Communications Commission RE: Docket 04-435
445 12th Street, SW
Washington, DC 20554

Dear FCC Commissioners ,

I am writing to voice my concerns about the FCC's proposal to relax the restrictions on the use of cell phones on airplanes in flight.

There is no hard evidence that cell phone use doesn't interfere with navigational instruments. The introduction of cell phone use in the cabin will not only increase tension among passengers, it will compromise flight attendants' ability to maintain order in an emergency. Cell phone use could also enable terrorists to coordinate a plan of action more effectively.

Are you CRAZY?! Do you not already notice the rudeness of people who can't seem to have a private, quiet conversation? These people seem to think they NEED to have the whole world listen to their conversations. I've had numerous run-ins with people at the theaters who talk on their cell phones during the movie; some which have almost became physical altercations. Do you want to see these scenarios on our airplanes? Whose STUPID idea is this anyway?...allowing cell phone use on planes. Absolutely Ridiculous...and probably suggested by one of these same rude individuals.

Please, unless you want arguments and fights on airplanes, leave the current rules in effect. As it is, flight attendants have enough to worry about trying to keep people in their seats while the seat belt sign is on and trying to keep people from congregating at the front service area. Do you want to add to this confusion by allowing cell phones? I fly alot, and I can promise you it's one of the worst ideas I've ever heard of.

Sincerely,

Xavier Uribe
